## Analysis of Target Need Areas

### CHILDREN AND YOUTH

A review of the key indicators used to evaluate the current status of children and youth in this county suggests that a majority of the indicators are at levels that are lower than the current levels for the state of Texas.

More specifically, the ratio of adults to children is 2.6. This is about the same as counties in the 12 CR and about the same as residents in the state of Texas. The percentage of people with children living in poverty is 15.6%. This rate of poverty is lower than majority of the other counties in the 12 CR and lower than residents in the state. Further, the percentage of people with children receiving TANF is 0% and the percentage of food stamp recipients is 1.7%. Compared to the 12 CR, the percentage of TANF recipients is lower than other counties and the percentage of food stamp recipients is lower than other counties. Compared to the state level the percentage of TANF recipients is lower and the percentage of food stamp recipients is lower. Although poverty does not necessarily cause social ills, it is related to the risk factors for many issues addressed by other indicators. This data suggests that future planning efforts for this county should include priority on maintaining current interventions addressed at eradicating poverty.

Our findings indicate that the residents of this county have a low rate of child abuse and neglect compared to residents across the state of Texas. This level of child abuse and neglect when compared to other areas is lower than other counties in the 12 CR. This data suggests that future planning efforts for this county should include priority on maintaining current interventions addressed at ensuring the physical security of children and youth.

The percentage of pregnant teens is reported to be 0%. The percentage of births to mothers under 18 years of age is 0%. These rates are lower than residents across the state of Texas. This data suggests that future planning efforts for this county should include priority on maintaining current interventions addressed at teen pregnancy.

Our findings indicate that the residents of this county have moderate prevalence rates of children and youth coping with a disability. This level when compared to other areas is about the same as residents in the 12 CR

and about the same as residents in the state of Texas. This data suggests that future planning efforts for this county should include priority on maintaining current interventions in these areas.

At 0 /100,000, the rate of juvenile violent crime arrests is lower than residents in the 12 CR and lower than residents in the state of Texas. This data suggests that future planning efforts for this county should include priority on maintaining current interventions in these areas.

The percentage of children attending Head Start is 0 %. This rate is lower than residents in the 12 CR and lower than residents in the state. The percentage of children in childcare with subsidized tuition is higher than residents in the 12 CR and higher than residents in the state. This data suggests that future planning efforts for this county should include priority on maintaining current interventions in these areas.

## **FAMILIES**

A review of the key indicators used to evaluate the current status of families in this county suggests that a majority of the indicators are at levels that are lower than the current levels for the state of Texas.

In considering that two parent families have historically been the arrangement for the rearing of healthy children, our findings indicate that the percentage of families with married couples is 74.7% and that this is higher than residents in the 12 CR and lower than residents in the state. The number of single parent households (mostly female headed) is associated with a worsening of several social, emotional and physical conditions for children's development. Children growing up in single family homes tend to live in more impoverished environments, are more likely to drop out of school, and are more likely to become heads of single families themselves. The percentage of families with single parents when compared to other areas is lower than residents in the 12 CR and higher than residents in the state of Texas. The percentage of babies born to unmarried mothers is 57.1% and this rate is higher than residents in the 12 CR and higher than residents in the state of Texas. This data suggests that future planning efforts for this county should include priority on maintaining or strengthening current interventions addressing these issues.

The rate of divorce in this county is .49. This rate is lower than residents in the 12 CR and lower than residents in the state of Texas.

The childcare facility capacity percentage (percentage of the county that can be accommodated by quality childcare facilities) is 0%. This rate is lower than residents in the 12 CR and lower than residents in the state of Texas. The percentage of grandparents caring for grandchildren is 55.2 %. This rate is higher than the 12 CR and higher than residents in the state of Texas. The percentage of children in childcare with subsidized tuition is 7.3%. This data suggests that future planning efforts for this county should include priority on maintaining current interventions addressing these issues.

The rate of children in foster care is lower than residents in the 12 CR and lower than residents in the state of Texas. The rate of children in family violence shelters is lower than residents in the 12 CR and lower than residents in the state of Texas. This data suggests that future planning efforts for this county should include priority on maintaining current interventions addressing these issues.

## **SENIORS**

A review of the key indicators used to evaluate the current status of seniors in this county suggests that a majority of the indicators are at levels that are higher than the current levels for the state of Texas.

The percentage of the population over 60 years of age is 18.8 %. This rate is higher than residents in the 12 CR and higher than residents in the state of Texas. The percentage of the population over 65 living alone is 11.5%.
